

**“Connecticut’s Weather Authority”**

## **Date of storm event: January 29-30, 2018**

A coastal low pressure began to develop off the North Carolina coast and move northeastward in the evening of January 29<sup>th</sup>. An area of snow developed just south of Long Island and first moved into New London, Tolland and Windham Counties between 9 PM and 11 PM on January 29<sup>th</sup>. This batch of snow spread westward through the rest of Connecticut between 1 AM and 3 AM on January 30<sup>th</sup> as the coastal low pressure began to intensify and move to a position east of Long Island. This batch of snow ended between 10 AM and 1 PM on January 30<sup>th</sup> from west to east as the low pressure moved out to sea. A few more snow showers moved into northern Fairfield and New Haven Counties between 7 PM and 9 PM on January 30<sup>th</sup> as the upper level support to the coastal system moved through.

*I attest that this report is a true and accurate account of weather conditions in the above mentioned area of the date(s) noted. All data was obtained from the official weather records maintained at The Connecticut Weather Center.*

A handwritten signature in black ink, appearing to read 'Paul Slaski', written over a faint, light-colored background.
